

### SMART HANDLING SOLUTIONS FOR WASTEWATER

Conveyor Industries is a privately owned New Zealand engineering company with over 25 years of experience designing, manufacturing, and installing bulk material handling systems across various industries throughout New Zealand and Australia. Known for our reliability, quality, and project expertise, we provide complete solutions backed by long-standing customer relationships, in-house design and fabrication capabilities, and the ability to deliver turnkey systems and manage complex projects.

In the wastewater sector, we supply systems including screw conveyors, silos, and biosolid transport bins—each purpose-built to withstand corrosive environments, reduce maintenance, and streamline the handling of sludge and dewatered materials.

### KEY EQUIPMENT

- Screw Conveyors
- Biosolid Transport Bins
- Silos with Sliding Frame Discharger

### ADDITIONAL ITEMS

- Structural Accessories
- Platforms & Walkways

### WHY CLIENTS ACROSS NEW ZEALAND & AUSTRALIA TRUST US

- ✓ Reliable systems with reduced downtime and maintenance
- ✓ End-to-end service provided
- ✓ Experienced in handling site-specific challenges
- ✓ Trusted by major municipal clients

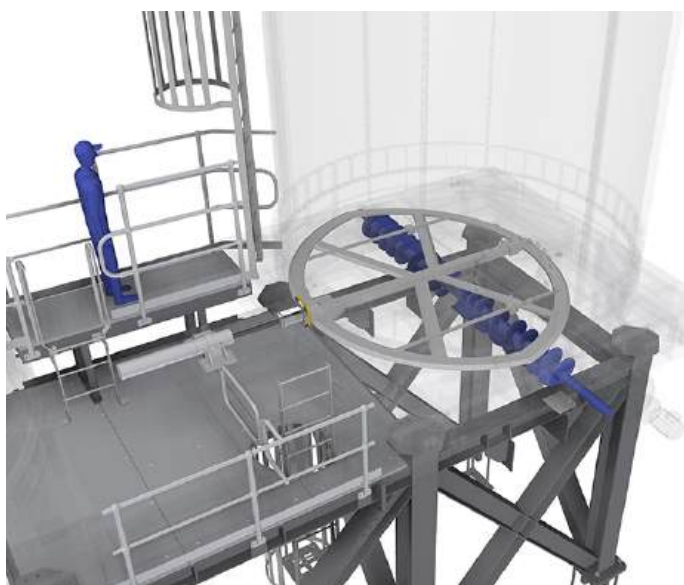

### SCREW CONVEYORS

- Option for multiple inlets and discharge points.
- Vertical, horizontal, or incline.
- Our shaftless screw conveyors are ideal for sticky products containing high moisture like wastewater sludge.

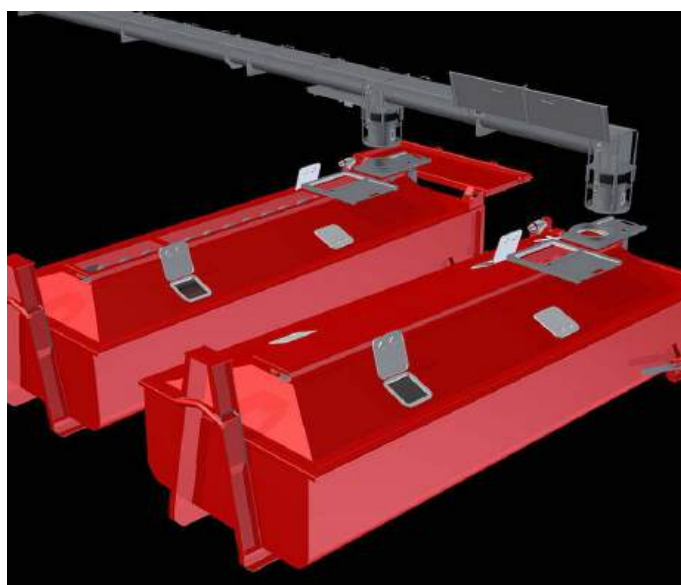

### CIRCULAR PANEL SILOS

- Standard capacity range: 35–3,500 m<sup>3</sup>. Larger sizes available upon request.
- Option to divide the silo into two or more compartments to contain different products.
- Complies to relevant NZ standards.

### SLIDING FRAME SILO DISCHARGER

- For round silos, optimising material flow and complete discharge.
- Effectively handles low-flow materials such as sludge.
- Prevents bridging, ensuring consistent flow and reduced downtime.

### BIOSOLID TRANSPORT BINS

- Ideal for screenings, grit, and sludge.
- Even load distribution with sealed, heavy-duty closure.
- Smart features: quick-connect power and ultrasonic level sensor.
